Slice thickness	Non Contrast: 3 mm axials Arterial: 3 mm axials; 3 mm thick coronal and sagittal Nephrographic: 3 mm coronal & sagittal reformats. 1mm axial through the lungs
Filming	B30f kernel B70f kernel for lung bases

### Comments:

- Siemens Abd Multi Phase settings.
- Pre-contrast component is optional; omit if scan is done for follow-up of known lesion, OR if urology deems it not necessary.

### **Combo 1: Chest, abdomen, and pelvis CT with contrast**

Indications: tumor staging.

Contrast parameters	Oral: 900 ml (approx 100 ml just before scan) IV: 100 ml @ 2.5 ml/sec
Region of scan	Lung apices to symphysis
Scan delay	Oral: 45-90 minutes from initial ingestion; 120 min for patients 10 years and younger IV: 60 seconds
Detector collimation	16 x 1.5 mm, 64 x 1.2 mm, 32 x 1.2 mm (128 slice)
Slice thickness	3 mm axials; 3 mm coronal & sagittal reformats 1mm axial through the lungs 8 x 2 mm coronal MIP through the lungs.
Filming	B30f kernel B70f kernel for lungs (including MIP reformats).

Comments:

- Siemens Abdomen Vol settings.
- For trauma scans: omit oral contrast. Perform sagittal reformats in B70f kernel, to include the anterior chest wall.
- Oral contrast delay can be shortened to 45-60 minutes if using Omnipaque.
- Optional CT navigational bronchoscopy images: 1 mm x 0.8 mm axial slices, B31F kernel, mediastinal window.

## Combo 2: Chest and abdomen CT with contrast

Indications: tumor staging.

Contrast parameters	Oral: 900 ml (approx 100 ml just before scan) IV: OR 100 ml @ 2.5 ml/sec
Region of scan	Lung apices to iliac crests
Scan delay	Oral: 45-60 minutes from initial ingestion IV: 60 seconds
Detector collimation	16 x 1.5 mm, 64 x 1.2 mm, 32 x 1.2 mm (128 slice)
Slice thickness	Axial 1mm lung kernel Axial 3mm soft tissue kernel Axial 8 x 2 mm MIPS Coronal and sagittal 3 mm reformats with soft tissue kernel
Filming	B30f kernel B70f kernel for lungs (including MIP reformats).

Comments:

- Siemens AbdomenVol settings.
- Keep 8 x 2 mm axial MIP's.
- Optional CT navigational bronchoscopy images: 1 mm x 0.8 mm axial slices, B31F kernel, mediastinal window.
