

20. PRE-OP RFA VEIN MAP

Image SFJ.

Mark GSV location to mid calf if vessel is large enough (approx. 3mm). The surgeon will access the GSV as distal as possible and as straight as possible.

Mark where the GSV is <10mm deep to skin.

Mark any dilated areas and any problematic branches/varicose veins.

Note what was marked on leg on worksheet. FAX worksheet to surgeon. If any questions or anomalies present call and explain to surgeon.
