A THANK YOU TO THE ANACORTES COMMUNITY

Over 20 years ago, we welcomed our first patient at Island Hospital. On October 9, 2026, we bid farewell to our last patient at Island Health. It has been a privilege and honor to care for not only these two patients, but also for the hundreds upon hundreds spanning the decades in between. It humbles us.

It is with gratitude to the dedicated medical staff, past and present, with whom we have collaborated to provide the finest care. We have prided ourselves on being more than just a phone call away. We were just down the hall available for in-person consult, procedure, or even coming in at night for an emergent patient need. We are forever indebted to the devoted technologists who brought kindness and expertise to every patient. They are part of the unsung force who helped us provide the highest quality care, regardless of obstacle, to every patient who came through the department.

Despite no longer seeing you as a patient at Island Health, we remain with you as part of the community. We will see you at shared school events with our children, chance encounters at The Store, Gere-a-Deli, the Anacortes Waterfront Festival, and even sharing a ride on the ferry to the San Juans.

While a geographic location has changed, the dedication to care for each and every one of you has not. Once a patient, always a patient. Skagit Radiology continues to be at the heart of community-based, onsite, outstanding diagnostic and interventional radiology services in Skagit, Whatcom and Island Counties, and even Kenai Peninsula and Fairbanks North Star for those who enjoy travel! We remain at your service and can be reached via website at www.skagitradiology.com or by phone at 360.424.6161.

With deepest gratitude and appreciation,
The Physicians and Staff of Skagit Radiology
